

# Making Playfield Lines on your New Bantam

Using the plastic template as your guide

- Find the center of the playfield by using the two center sites. Mark your center with a dot then draw a circle.
- Slide your template to line up with the rail site to the left of the center and draw a line
- Slide your template to line up with the rail site to the right of the center and draw a line

**NOTE: We recommend using a fine tip paint pen**

**\*\* using a sharpie will bleed on the cloth \*\***
